**All samples are to be maintained at 4 degrees Celsius.**  
**Yellow-highlighted cells indicate short hold parameters.**

DW = Drinking Water; G = Glass; GTLC = Glass with Teflon-lined cap; GTLS = Glass with Teflon-lined septum; P = Polyethylene; WW = Waste Water

- (1) = 7 days if not preserved with HCl or if pH > 2.
- (2) = Holding time once sample is extracted is 40 days.
- (3) = If pH is not between 5 and 9, 72-hour hold time unless pH is adjusted.
- (4) = 24 hours if not preserved.
- (5) = If source is chlorinated vials, should be preserved with Ascorbic Acid.
- (6) = 48 hours to lab prep Encores or TerraCores (e.g., in NJ, NY, and PA), then 14-day hold time applies.
- (7) = The unpreserved portion of sample should be treated with lead carbonate for Sulfide interferences and then filtered within 24 hours of collection.
- (8) = Hexavalent Chromium in soil: 30 days for extraction, then 7 days for analysis.
- (9) = Days for TCLP/SPLP extraction, then follow method holding times.
